Description of idea – about ELMAR project

- Overall goal: To **support the boat & shipbuilding sector** in the SB area to adapt to **marine e-mobility** by:
 - **promoting** marine e-mobility products (> e-boats/-ships, related products & services) **on international markets**
 - **demonstrating the innovation potential** of e-boats & e-ships from the SBA towards potential buyers & municipal decision-makers / infrastructure providers
 - **Developing the SBA as home-market** for low-emission boating, catching up international market trends
 - Building up & **strengthening the cross-border supply chains** both within the SBA and to essential suppliers outside
